

# VistaBeam® DMX

CINEC® Award

Center Mount w/ Hanging Adapter

Pole-Operation

Kino Flo's VistaBeam® 600 and 300 will change the way our industry lights film and television studios. The VistaBeam 600 puts out more light than a 4K quartz softlight (120VAC) but uses only 9 Amps of power compared to 34 Amps needed for the quartz light. Its compact sibling, the VistaBeam 300, is half the size and delivers more light than a 2,000 Watt quartz softlight. Both fixtures have a DMX control system. The versatile center mount versions excel both as downlights that can replace energy sapping tungsten space lights in studios and as key and fill sources stand-mounted on the stage floor. VistaBeams take the new Kino Flo True Match® 96 Watt (CFL) technology. A Kino Flo innovation on parabolic reflector design intensifies the spread and distance of the beam to produce the industry's brightest cool light source. New focusing honeycomb louvers shape the beam down to 90° and 60°. Snap and click lamp clips allow for easy changes between tungsten and daylight True Match lamps. Features include:

- DMX lamp switching
- HO/Standard switching
- Individual lamp control
- Flicker-free, remote operation
- Reflector, Louver and Gel Frame
- Center Mount or Yoke options\*
- Stackable design
- Instant-on, dead quiet
- True Match® daylight and tungsten balanced lamps

• Pole-Operation version now available.
