## BatWing Louver

Cut Spill with Minimal Light Loss

# BatWing

The BatWing Louvers control the spread and direction of light in a Kino Flo 4Bank, Double or Single fixture. They also solve the problem of spill light off the ends of the fixture, without using blackwrap or other materials that restrict airflow and overheat the lamps. The lightweight BatWing design includes a clip-on mount and adjustable louver panels that fan out when the fixture barndoors are opened. They are removable, portable and durable.

## ▼ Details

BatWing attaches directly onto Kino Flo safety coated lamps.

Adjustable height and angle

Velcro retainer

## ▼ BatWing Louver Kits

**BAT-W4**  
BatWing 4Bank Louver Kit, (5pk)

**BAT-W2**
