Dedo Kits

Dedo 400 & 200 HMI Kits

Dedo 400/575W HMI Kit **\$215.00**

Includes: DLH400D HMI Lamp-head, DEB400D Flicker-Free Ballast, Barndoor, Scrim Kit, Filter Holder, 23ft Head Extension, 400W HMI Lamp, Ship Case

Options

Dedo 400 Projection Attachment Kit **\$75.00**
Includes: Condenser, Universal Receptacle, Lens Holder Barrel, Lens 185mm, Iris, Gobo Holder, Framing Shutters, Ship Case

Dedo 650 Kits

Dedo 650 Tungsten Kit (3-Unit) **\$210.00**

Includes: DLH650 Light Head (3), Filter holder (3), Barndoor (3), Light Shield Ring (3), Scrim Kit (3), Scrim Pouch (3), Lamp (5), Ship Case

Options

Dedo 400 Projection Attachment Kit **\$75.00**
Includes: Condenser, Universal Receptacle, Lens Holder Barrel, Lens 185mm, Iris, Gobo Holder, Framing Shutters, Ship Case

Dedo 200W HMI Kit **\$185.00**

Includes: DEH200D Lamp-head, DEB200D Flicker-Free Ballast, Barndoor, Lightshield Ring, 23ft Head Extension, 200W HMI Lamp, Ship Case

Options

DP1 Projection Attachment Kit **\$25.00**
DP2 "Gaffer" Projection Attachment Kit **\$15.00**

Dedo 150W Kits (Aspherics2)

Dedo 150W / 24V Dimming Kit (3-Unit) **\$150.00**

Includes: DLH4 Lamp-head (3), DT24-1 In-line Dimmer (3), Stand (3), Barndoor (3), Filter Holder (3), DCLAMP, DL-150 Halogen lamp (4), Ship Case

Options

DP1 Projection Attachment Kit **\$25.00**
DP2 "Gaffer" Projection Attachment Kit **\$15.00**

Product **Daily rate**

Dedo 150W / 24V Kit (3-Unit) \$150.00

Includes: DT-150 Control Unit, DLH4 Lamp-head (3), Barndoor (3), Stand (3), DV6B Vacuum Mount, Filter Holder (3), DH2 Holder (3), 30ft Head Extension (3), DL-150 Halogen Lamp (4), Ship Case

Options

DP1 Projection Attachment Kit **\$25.00**
 DP2 "Gaffer" Projection Attachment Kit **\$15.00**

Dedo 150W / Built-In Dimming Kit (4-Unit) \$180.00

Includes: DLHM4-300U Dimmable Lamp-head (4), Filter Holder (4), Barndoor (4), Stand (4), DCLAMP, DL-150 Halogen Lamp (5), Ship Case

Options

DP1 Projection Attachment Kit **\$25.00**
 DP2 "Gaffer" Projection Attachment Kit **\$15.00**

Product **Daily rate**

Dedo 100W Kits

Dedo 100W/12v Kit (4-Unit) \$100.00

Includes: DLH3 Lamp-head (3), DT12-4 Control Unit, DLHB-4 Lamp-head, Filter Holder (4), Barndoor (4), Stand (2), DV6B Vacuum Mount, DH2 Holder (4), 30ft Head Extension (3), DX15 Adapter Extension, Cig Adapter, DL-100 Halogen Lamp (5), Ship Case

Options

DP1 Projection Attachment Kit **\$25.00**
 DP2 "Gaffer" Projection Attachment Kit **\$15.00**

Dedo 100W Built-in Kit (4-Unit) \$100.00

Includes: DLHM 120VAC Lamp Head (4), Stand (4), Barndoor (4), Filter Holder (4), DL-100 Halogen Lamp (5), Ship Case

Options

DP1 Projection Attachment Kit **\$25.00**
 DP2 "Gaffer" Projection Attachment Kit **\$15.00**

Note: Dedo 400 Projection Attachments can be used on 400 HMI and 650 Tungsten Heads. The DP1 and DP2 can be used on 100W, 150W and 200W Heads.

Frequently Asked Questions

Lamp Questions:

What is the difference between Kino Flo Fluorescents and store bought fluorescents?

Kino Flo lamps are the only fluorescent lamps designed to correspond to the spectral sensitivity of film and digital recording technologies. In 1995 Kino Flo was awarded an Academy Award in recognition of this achievement.

Is there a color difference between Kino Flo lamps operating in an architectural fixture vs. a Kino Flo fixture?

Kino Flo's T12 800ma lamps will operate in architectural fixtures. Due to the lower operating currents of architectural fixtures, the lamps may appear slightly more magenta to the eye than the lamps in regular Kino Flo fixtures. The lamps on film or digital match very well between the two types of fixtures.

What is the difference between single pin lamps and double pin lamps?

Single pin lamps are referred to as Slim line fluorescents. Slim line lamps will not operate on Kino Flo ballasts. Double pin (bi-pin) lamps will operate on Kino Flo ballasts. Using other bi-pin lamps on Kino Flo ballasts may shorten their life span.

Do Kino Flo lamps operate in architectural HO fixtures?

Architectural HO fixtures can range in lengths of 4ft, 6ft and 8ft. They use a lamp that has a double recessed bi-pin end cap. It looks similar to a single pin lamp but the pin is hollow and oval shaped. Kino Flo 6ft and 8ft lamps can be modified with an accessory Double Recessed End Cap (EXP-RDC) that slides over the regular medium bi-pin. The Kino Flo 4ft lamp cannot be modified to fit because architectural 4ft HO lamps are 3 inches shorter.

Why do some identical lamps in a fixture appear slightly different?

Slight variations on appearance are common from lamp to lamp. The age of a lamp and the batch number can account for variations. When evaluating color temperature, position the color meter at least 24 inches from the fixture or lamp. Holding the meter too close may result in inaccurate readings.

What does High Output mean?

HO or High Output is the term the industry uses to describe lamps which are burning at a higher than normal lamp current. Normal fluorescent lamp currents operate a lamp at between 280ma to 320ma. HO refers to lamps operating at or above 800-900ma. Lamps operating at 1500ma are referred to as VHO. Kino Flo Select ballasts can switch between HO and Std (High Output/Standard and 4ft/2ft) lamp operation.

Why do my lamps read green on my color meter?

In a fixture with restricted airflow, lamps can heat up and exceed the temperature operating range for good color. Lamps should never be fully enclosed with gel or diffusion. As the temperature of a lamp increases, so does the mercury pressure in the lamp. This increased mercury pressure appears as a blue green light. The higher the temperature the bluer and greener a lamp can appear.

Tip:

If a 4ft lamp is operating too hot and the color is turning green, switch the select switch to Std or 2ft. This will reduce the lamp current and drop the green spike.

Dimming vs. Switching

All fluorescent lamps will warm and drift towards magenta when dimmed. The shift is continual as the lamp physically cools. Kino Flo recommends only dimming one stop to ensure good color. The Select ballast series changes light levels without affecting color balance through switching lamps on and off and by using the 4ft/2ft switch. The select switch adjusts the lamps by ½ f-stop.

Ballast Questions:

What is the select switch for?

The select switch is used to optimize lamp performance and color temperature. Four-foot lamps should operate at the 4ft setting. Two-foot lamps should operate at the 2ft setting. The select switch can also be used to control light output by switching a 4ft lamp from 4ft to 2ft in a ½ stop increment.

Caution:

If a 2ft lamp operates in the 4ft setting, the color may turn green and not match that of a 4ft lamp.

Tip:

If a 4ft lamp is operating too hot and the color is shifting green, switch the select switch to Std or 2ft. This will reduce the lamp current and drop the green spike.

Can I shoot at 50Hz?

Kino Flo ballasts can operate at 50Hz, 60Hz and as high as 400Hz. When shooting in a 50Hz country, it will be important to use a 230 Volt ballast or use a step down transformer. The Kino Flo ballast is designed to be flicker free in either a 50Hz or 60Hz environment.

Can I shoot at any shutter speed and not get flicker?

Kino Flo ballasts are designed to be flicker free at any shutter speed. As with any electronics, failure of certain components within the ballast may result in flicker on a high-speed shot. For this reason, it is advisable to run a camera test on any critical high-speed shot.

Can I use Kino Flo ballasts on a dimmer board?

Kino Flo ballasts can operate through a dimmer board. Set the operating channel as a non-dim control. This enables the board to turn the ballast on or off. The lamps will not dim through the dimmer. If the ballast is dimmed on the dimmer, the lamps will strobe and go out. A Dmx dimmer board can switch individual lamps on and off or dim certain models of fixtures through Dmx commands.

How many extensions can I run with Kino Flo ballasts?

Do not exceed 3 x 25ft extensions. Using more extensions may result in lamp instability.

Why is the neutral drawing more than the hot leg?

Kino Flo ballasts are generally not power factor corrected. They will draw double the current on the neutral from what is being drawn on the two hot legs. On large installations it may be necessary to double your neutral run so as not to exceed your cable capacity. The Diva and ParaBeam series of fixtures are power factor corrected and do not need additional capacity on the neutral.

When should I use an Opto-Isolator?

Opto-Isolators are recommended for Dmx runs greater than 250ft.

How many Trans-Flo ballasts can I daisy chain?

A maximum of 10 Trans-Flo ballasts can operate on one Primary Power Feed Cable.

Can I use an inverter and battery pack to operate a Kino Flo ballast?

Kino Flo recommends a pure sine wave inverter. Inexpensive saw tooth or near sine wave inverters may not work.

Can I use a Kino Flo Inverter with a car battery?

Kino Flo's Inverter System is an integrated system. The battery packs and power cables are sized to allow sufficient power to operate as much as 1800 Watts. A regular car battery would not have significant power to drive the system.

Rental Questions:

What stands do I need for Kino Flo fixtures?

A Grip Stand is recommended if ordering the fixtures with the regular Mounting Plate with 3/8" pin mount. Kino Flo does not rent Grip Stands. A regular baby stand is used if ordering fixtures with Baby Receiver Mounts.

Will the equipment fit in my car?

Diva or ParaBeam fixtures as well as 12V kits should fit into a passenger type vehicle. If ordering any 2ft and 4ft fixtures, the case dimensions may fall into the 5ft range. Orders that contain 6ft and 8ft lamps or fixtures are packed in cases approximately 8ft long. Please make sure your vehicle can make the necessary accommodations.

How do I open an account?

Simply make a call to the rental department and request "New Customer" paperwork. We will then fax or mail the necessary documents that need to be completed.

Do I need to have insurance to rent equipment?

Kino Flo requires an insurance certificate naming Kino Flo as "Loss Payee" and "Additional Insured". Please see "Insurance Requirements" for more specific information.

What form of payment is acceptable for renting equipment?

Kino Flo accepts credit cards, corporate checks and cash. No personal checks are accepted.

What credit cards does Kino Flo accept?

Kino Flo Rentals accepts American Express, Visa and MasterCard.

Kino Flo Rental Policy

Business Hours

Kino Flo is open Monday through Friday, 8:30am to 5:00pm excluding holidays. After hours and weekends by appointment only.

Pick-up and Delivery

Transportation for pick-ups and returns is the sole responsibility of the renter.

Rental Period

Minimum rental period is one day. Equipment must be returned by 12:00pm to avoid an extra day charge unless previous arrangements have been made.

Shipments

All Shipments made outside of the Los Angeles area by air or ground will be shipped collect. All rented equipment shipped back to Kino Flo must be shipped prepaid. Minimum rental on a shipped order is two days. Rental does not end until the shipment is received by Kino Flo unless previous arrangements have been made.

Damaged Equipment

All equipment is rented in good working condition and is to be returned in good working condition. Any repair work necessary shall be paid by the renter. If the condition of the equipment is beyond repair, renter shall pay for full replacement.

Lamps

All units are furnished with lamps. Spare lamps are included at no extra cost. The amount of spare lamps received is determined by the Kino Flo rental consultant, depending on the size and duration of the rental order. Spares and burn-outs must be returned or replacement cost will be charged.

Cancellations

In the event of a cancellation after an order has been confirmed, a 20% restocking fee will be applied in consideration of Kino Flo Lighting Systems preparing, holding in reserve equipment on your behalf.

Payment / Pricing

Prices quoted in this catalog are daily rates effective as of April 2nd, 2010.

Prices and terms subject to change without prior notice. Please confirm all estimated costs and terms with your rental consultant.

All prices are quoted in U.S. dollars, F.O.B., Burbank, California and are subject to change without notice. Possession of this price list does not in itself constitute an offer to rent. All orders are subject to acceptance by Kino Flo. The minimum order is \$50.00 before shipping and handling. Payment on new accounts is C.O.D. until credit is established. Credit terms are Net 10 or Net 30 from the date of invoice.

Insurance Requirements

Renter shall provide their own insurance to cover liability and the replacement value of the equipment rented for all loss and damage. A certificate of insurance naming Kino Flo Lighting Systems as ADDITIONAL INSURED and LOSS PAYEE must be made available prior to the release of equipment.

The lessee agrees to pay the rental price for the equipment rented. Should said equipment, or any part thereof, be lost, damaged, or destroyed by fire, casualty of any kind, act of God or other act or accident, the lessee agrees to pay the full replacement value, or in the event of damage, the lessee agrees to pay the accrued rental plus the cost of damage. Rent shall be due whether or not such a loss has occurred. Obligation to pay rent shall only cease at the point of payment for all losses suffered by lessor.

Lessee agrees to and does hereby indemnify lessor and hold lessor, its agents and employees harmless of and from any and all losses, damages, claims, demands of liability of any kind or nature whatsoever, including legal expenses, arising from the use, condition, (including without limitation latent and other defects) or operation of the equipment rented, and by whosoever used or operated during the term hereof. This indemnification shall continue in full force and effect during and after term of this rental for cause arising during the term of this rental.

Lessee at its own expense, agrees to furnish lessor with Certificate of Insurance prior to release of equipment, with coverage as follows:

Equipment

Miscellaneous Equipment Coverage: Minimums shall vary according to the value of the total equipment rented, and shall not be less than the full replacement value of all equipment rented. Coverage to include all listed equipment for "ALL RISK" perils, and contain a LOSS PAYEE clause endorsement stated as follows: Effective (DATE), it is understood and agreed that the certificate holder is recognized as LOSS PAYEE as respects to (VALUED AMOUNT) misc. rented equipment and that said policy is primary and not in excess of, or contributory to, any other insurance provided for the benefit of, or by, the certificate holder.

Liability

General Liability Coverage: Minimum \$1,000,000 combined single limits, bodily injury and property damage is to be maintained for the term of this rental. Kino Flo Lighting Systems is to be named ADDITIONAL INSURED, as respects to the rental of this equipment during the term of this rental agreement.

Kino Flo Lighting Systems is in no way responsible for any liabilities, claims, costs, or expenses arising out of the use or possession of its equipment. Our equipment is available for inspection at the time of pick up. Kino Flo Lighting Systems understands that equipment rented will be used by well trained, motion picture industry professionals.
