FreeStyle 31/21 LED Fixture New Design

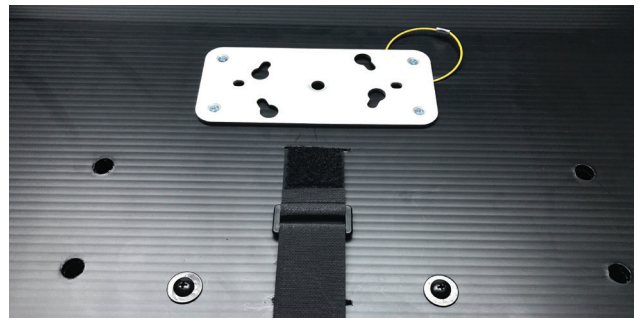

BURBANK, CA – Kino Flo is introducing a design change to the plastic housings of our FreeStyle 31 and 21 LED Fixtures. The new designs will have a smaller hole diameter stamped into the plastic housing allowing for a tighter fit for the LED Controller. In addition, the plastic grommets will no longer be used.

This design change will also coincide with a name change where the name “FreeStyle” is more prominent. Please refer to the photographs below.

The new design will be available in October 2017.

New Plastic Housing without plastic grommets.

Previous Plastic Housing with plastic grommets.
