

# BarFly® 450 DMX & 200D

The BarFly® 450 DMX & 200D are the next generation of thin BarFly lighting systems. The soft cool beauty lights feature a narrow profile of 4.5" in depth with onboard dimming ballasts, lamp switching and universal input voltage (100VAC-240VAC). The BarFly 450 also features DMX dimming and DMX lamp switching.

The BarFly 450 is brighter than a 1,000 Watt tungsten softlight, but draws only 2 amps, while the BarFly 200D is equivalent to a 500 Watt tungsten softlight drawing only 1 amp of power. Both fixtures include a built-in reflector and removable gel frame, honeycomb louver and center mount. The lightweight fixtures are ideal for difficult tight shots on location or in the studio. The fixtures take 3200K and 5500K True Match® lamps that display a full range of high color rendering (CRI 95) soft light.

Features include:

- Narrow profile
- Flicker-free, dead quiet
- Onboard and remote dimming
- Individual lamp switching
- DMX dimming and DMX lamp switching (BarFly 450)
- Universal input 100VAC-240VAC
- Removable Center Mount
- Reflector, Louver and Gel Frame
- True Match® daylight and tungsten balanced lamps
