New! Celeb 850 LED Yoke Mount/Pole-Op Models

BURBANK, CA – Kino Flo’s **Celeb® 850 LED DMX** family line now includes Yoke Mount and Pole-Op models. These two models are designed with built-in electronics mounted on the center of the fixtures which makes them ideal for hanging in the studio.

One of the largest LED’s in the industry, the Celeb 850 measures 45” x 26” (114cm x 66cm) at only 6” (15cm) in depth. The fixture puts out 111FC at 10ft (1251 LUX at 3M), but only uses 5.0A (120VAC).

All Celeb 850 models have the same menu options, one white and two color menus with a Kelvin range from 2500K to 9900K with full **Green/Magenta**, **Gel**, **Hue/Saturation** and **RGB** color control features.

Additional features include presets and custom settings, full range dimming without flicker or color shift. Light levels do not change when selecting Kelvin settings.

The Celeb 850 also comes with standard DMX and wireless DMX (Lumen Radio®), and universal voltage input 100-240VAC.

The Center Mount was introduced in October 2017. Yoke Mount and Pole-Op models will be available May 2018. In addition, the Yoke Mount version will also be available as a kit.

Key features are:

- Kelvin presets & custom settings, 2500K-9900K
- Manual & DMX Dimming
- DMX wireless link (Lumen Radio)
- Green/Magenta control
- Dial in any color through Hue Angle and Saturation control
- Kino Flo presets and Gel presets
- Individual Red, Green, Blue (RGB) control
- Dimming without color shift
- Universal input 100VAC-240VAC
- Flicker-free, quiet operation
- Honeycomb Louver
- Center Mount, Yoke Mount, Pole-Op
