New Kino/Lumen Radio DMX Transmitter

Burbank, CA – Kino Flo Lighting Systems introduces a DMX wireless transmitter, **DMX-TL100**. Wireless is an alternative to DMX cables. The DMX transmitter includes Lumen Radio CRMX technology and is used to transmit DMX wirelessly to any product with a Lumen Radio receiver. For example:

- Celeb LED 201, 401 & 401Q DMX
- Diva-Lite LED 30 & 20 DMX
- Select LED 30 & 20 DMX

The DMX-TL100 is compatible with any full DMX 512 console or battery operated DMX 512 control board.

It operates on universal input from 100VAC to 240VAC. It will be available in June 2016 for U.S. and Canada sales.
