***New! FreeStyle 151X LED DMX Controller***

**BURBANK, CA** – Kino Flo Lighting Systems' **FreeStyle 151X LED DMX Controller** replaces Select/LED controller model 150X. The two models have the same feature set and software. These controllers are interchangeable between Select 20/30 or FreeStyle 21/31 fixture heads and use the same head extensions. Both models will be supported with future software upgrades as they become available.

The introduction of the **FreeStyle Controller** name reflects the increased popularity of the FreeStyle fixture with the ability to remove the LED panel from the plastic housing, slip into a Gaffer Tray accessory or use as an individual panel.

The FreeStyle 151X can dial in an expanded Kelvin color temperature range from 2500K to 9900K with full **Green/Magenta, Gel, Hue/Saturation** and **RGB** color control features.

Additional features include presets and custom settings, full range dimming without flicker or color shift. Light levels do not change when selecting Kelvin settings. The FreeStyle 151X comes with standard DMX and wireless DMX (Lumen Radio®), universal input voltage 100-240VAC and 24VDC.

The FreeStyle 151X LED DMX Controller will be available March 2018.

**Key features are:**

- Tunable Kelvin 2500K-9900K
- Dimming without color shift
- Green/Magenta control
- Dial in any color through Hue Angle and Saturation control
- Kino Flo presets and Gel presets
- Individual Red, Green, Blue (RGB) control
- Manual and DMX dimming w/ Auto Terminate
- DMX wireless link (Lumen Radio)
- Universal input 100VAC-240VAC and 24VDC
