Kino Flo Remakes LED's in Their Image

BURBANK, CA – Kino Flo Lighting Systems is ramping up retrofits of its legacy fluorescent Image fixtures to repurpose them as Image LED fixtures starting this June. Repurposing the legacy Image studio series products makes it easy and affordable for customers to transition their used inventory to the latest Kino Flo LED technology that comes standard on the company's Celeb, FreeStyle and Diva-Lite LED lights.

"Over the past few years there has been growing interest in repurposing fixtures from fluorescent technology to LED designs," according to Kino Flo President and Founder, Frieder Hochheim. "Kino Flo is proud to launch the LED conversion program during Cine Gear Expo 2018, in Hollywood, June 1-2. Kino Flo will show off repurposed Image fixtures at Booth 125B, on the New York Street back lot stage."

Kino Flo supplies pre-assembled, 5-emitter LED panels along with a specially designed "LED control cover" with all the electronics and controls built in. The new LED cover will replace the existing Image 80/85/87 or Image 40/45/47 covers, and will conform to ETL electrical standards.

Repurposing fixtures with Kino Flo engineered LED panels and control electronics (including the new TrueMatch® Firmware 3.0) breathes new life into the older Image shells. Some of the features include Kino Flo's easy-to-use menu and color management system, the popular White Light mode >96 photo rendering, full correlated color temperature selection (2500K to 9900K), Hue Angle & Saturation mode, Gel Presets, RGB mode, and the new Lighting Effects mode.

The new controller covers will also include built-in Lumen Radio wireless DMX, universal VAC input, advanced square wave and linear dimming, plus some added features unique to the Kino Flo retrofit design.

Kino Flo will offer DIY "conversion kits" for customers outside the Los Angeles area. Customers in the Los Angeles area can also purchase the conversion kits – or they can bring the fixtures into Kino Flo. Kino Flo will repurpose fixtures to LED versions.

Kino Flo will have more details on the conversion program during the Cine Gear Expo in Hollywood, **June 1-2**. For those not able to attend the show, Kino Flo will email photos of prototypes and price quotes to customers. The company will show off the new repurposed Image LED fixtures at Booth 125B, New York Street back lot stage.
